- Improved inventory accuracy to 99.9%
- Increased build capacity by 3x in just 2 months
- Successfully fulfilled 5x normal volumes during holiday peak

Logistics Services Provided

- Warehousing
- E-commerce fulfillment
- Retail delivery
- Kitting
- Inventory management
- Consolidation
- Transportation: asset-based and brokerage

“FST meets the needs of our business as they come. We are supported by them strategically in ways that other providers don't. I sleep better at night knowing that my team is working with FST... They put a lot of dedication into our day-to-day business, in a way that is above and beyond.”

with Care**

Problem

Jordan's Skinny Mixes outgrew its previous logistics provider, and was challenged keeping up with growing order quantities and managing a complex set of SKUs. Order accuracy and fill rates suffered as a result. Skinny Mixes needed a full-service provider to execute ongoing fulfillment services and manage inbound and outbound transportation.

Solution

Skinny Mixes selected FST Logistics because of their CPG experience and full suite of capabilities. The sugar-free syrup brand moved all its warehousing to FST and entrusted them with go-to-market order fulfillment.

Unlike larger 3PLs, who offer one-size-fits-all services, FST partnered alongside Skinny Mixes to provide custom solutions. "If working with a nationwide provider, we'd need to plug into what was already established," said Jordan's Skinny Mixes. "FST is different and willing to partner and meet our unique complexities."

The companies jointly built an E-commerce fulfillment function that solved for high-touch kitting and introduced technology solutions for stronger stock management. FST also enhanced business performance transparency and helped Skinny Mixes understand previously elusive transportation metrics.

Results

FST simplified Skinny Mixes' supply chain and solved for fundamental issues. "I sleep better at night knowing that my team is working with FST," said Jordan's Skinny Mixes. "They put a lot of dedication into our day-to-day business, in a way that is above and beyond."

As a full-service provider, FST helped Skinny Mixes to increase fill rates, streamline transportation and establish standardized reporting. The sugar-free syrup brand is now on track to achieve nearly 100% on-time and in full for retail and consumer deliveries.

Amidst record-setting daily order quantities and peak season, FST successfully increased Skinny Mixes' fill rates by 5x while maintaining order accuracy. New inventory management strategies, paired with proactive and honest communication, helped Skinny Mixes to successfully prepare for events such as Black Friday and Cyber Monday and get ahead of expedited orders.

"It's great knowing that we have a partner that will communicate, even when issues arise," adds Jordan's Skinny Mixes. "FST is transparent, professional and supportive." By partnering with FST, Skinny Mixes has accurate performance data and can make confident business decisions. The company is set up for endless growth with no limits on fulfillment capabilities.
